SABARAGAMUWA TEA

1.Introduction

(a) Sri Lanka Tea Board

The Sri Lanka Tea Board (hereinafter called SLTB) is a body incorporated under the provisions of Sri Lanka Tea Board Law No.14 of 1975 of the Parliament of Sri Lanka for the purpose of administering, controlling and regulating the tea industry in Sri Lanka. The SLTB is empowered to take measures to regulate the tea cultivation, manufacture, sale, export, import and marketing of tea as provided for in the Tea Control Act No.51 of 1957, Tea (Tax and Control of Export) Act No.16 of 1959 and Sri Lanka Tea Board Law No.14 of 1975.

(b) The Board of Directors of SLTB consists of a Chairman, and other members who have knowledge and experience in different aspects of the tea industry with special reference to planting, research, manufacture, marketing, sale, export etc. appointed by the Honourable Minister under whose purview the subject of Plantation Industries, falls.

(c) Tea from Sabaragamuwa Agro-climatic region of Sri Lanka

Sri Lanka (formerly Ceylon) is an island of 65,610 sq.km., located between 5° 55'- 9° 51' North of the Equator, ascending from sea level to approximately 2400 meters. The average temperature in the country varies from around 28° C in low lands to around 15° C in the high elevation. The first commercial tea plantation was established in Sri Lanka in 1867 and tea is grown in three different elevations from sea level as Low grown Ceylon Tea, Medium grown Ceylon Tea and High grown Ceylon Tea.

The Sabaragamuwa Agro-climatic region, falls under the low grown elevation, is situated in the Ratnapura and Kegalle Administrative Districts of Sri Lanka (Maps enclosed). Since the turn of the 20th century, tea has been cultivated and grown in the tea gardens and manufactured in tea factories geographically located in the Sabaragamuwa Agro-climatic region, which spreads over an extensive area from sea level to an elevation of approximately

2500 feet (800 meters) comprising vast sub regions from the Southern plains bordering the Sinharaja Rain Forest up to South of the Central hills.

(d) The vigorous growth of the tea bush due to high humidity and well distributed rainfall in the Sabaragamuwa region results in production of medium bodied tea but much mellower than teas from tea plantation situated at lower elevation levels. Sabaragamuwa tea is predominantly hand picked by experienced workers who select only the tender-most leaves and bud. Sabaragamuwa tea enjoys both domestic and international reputation for unique quality, gentle character and stylish leaf appearance that are associated with its production in the region.

2. **Definition of Sabaragamuwa Tea**

Sabaragamuwa Tea means:-

- (a) Teas cultivated and grown in the tea gardens and manufactured in tea factories in the Sabaragamuwa Agro-climatic region and it's sub regions of Sri Lanka, listed in the Annex I.

- (c) Teas produced with the tender leaves of selected cultivars of species *Camellia Sinensis*, nurtured by the edaphic agro climatic conditions. Besides, the unique manufacturing practices developed in the various tea estates and factories in the Sabaragamuwa Agro-climatic region of Sri Lanka and the effect of congenial atmosphere of Sinharaja rain forest on tea gardens in Sabaragamuwa region produce tea with special leaf appearance, medium body and brightness ranging from deep orange to red in colour, which has earned the recognition of discerning
